

COVID-19 TREATMENT

***If you have COVID-19,
treatment may be available.***

Early treatment can help prevent severe illness. To be effective, you need to begin treatment **within days** of your symptoms starting.

Treatment is for people at higher risk, including some health conditions and pregnancy. People who are vaccinated and not vaccinated can receive treatment.

The first step to get treatment is to get tested.

Find out more about COVID-19 treatment and who is eligible at www.manitoba.ca/covid19/treatment or call Health Links — Info Santé at 204-788-8200 or 1-888-315-9257.
