I'm writing in regards to expansion of a poultry operation TRC 12-107 which is just 500 meters from Landmark. We already have to close windows 50 % of time because of all the pig and chicken facilities and odour they create . Expanding one so close to fast growing town would create even worse air quality then it is right now . Please have some concern about our health and well being and keep air and water polluting farms away from bigger human habitats .
Sincerely Les Lodowski

Good Day!

This email is regarding the proposed expansion of Unger Poultry Ltd.
I Farm adjacent to this farm and am one of their closest neighbours. I have zero concerns with their expansion desires. They are a well run farm with great concern and care for their animals and neighbors. They are an asset to the community as they provide employment for many in the community. We need more farms that are managed like Unger Poultry!

I would like to share my views concerning this proposed expansion of poultry operation by Unger Poultry Ltd.

I object to this expansion.

It is too close to the residential area - there are enough odours from livestock and related farming operations already.

The residents of Landmark do not need more.

Place this type of operation further away from established residential areas.

Please let me know if anything further is required in order to express my views.

Thank you,
Leslie McLaren

We are writing in response to a mailing we received in the mail regarding concerns about the proposed expansion of a poultry operation - Unger Poultry Ltd (TRC 12-107).

We do not agree with this proposal and therefore do not want it to proceed. It is too close to the town of Landmark.

Thank you

John & Karen Martens

Hello,

I am opposed to this expansion doesn't need to be any bigger than it is. It is too close to town and my house, the smell and flies are horrible in fall and spring not to mention environmental factors this affects. I am opposing to this expansion.

Thanks,

Concerned Landmark resident

Melissa Lovejoy
