

3.3M Vertical Alignment

3.3.5M Vertical Alignment: Design Domain Additional Application Heuristics

3.3.5.5M Vertical Clearances: Application Heuristics

The TAC Subsection **3.3.5.5** is applicable to the Department's highways with the following substitutions:

Roads

The Department's minimum vertical clearance for vehicular structure over traveled lanes and shoulders is 5.4 m. This value is intended to accommodate future overlay of 0.1 m therefore the provision of additional clearance beyond 5.4 m is normally not required.

Railways

Refer to the latest applicable railway standard on vertical clearance requirements.

Pedestrian Overpasses

The minimum vertical clearance for pedestrian overpasses is 7.0 m.
