

**4.7M                      Curbs and Gutters**

**4.7.2M                  Curbs: Best Practices**

The TAC Subsection **4.7.2** is applicable to the Department's highways with the following addition:

- Asphalt curbs should be restricted to locations where the curb is temporary (i.e. temporary transition from 2 to 4 lanes) or where the curb is well removed from the traveled paths and the adjacent surface is asphalt (i.e. asphalt curb at the edge of an asphalt shoulder to channel drainage). The use of asphalt curbs should be limited because they are easily broken and/or deteriorate quickly and become aesthetically unpleasing.
