**Annual Average Daily Traffic on  
Provincial Trunk Highways  
and Provincial Roads**

NOTE: Numbers on the map denote the combined Annual Average Daily Traffic (AADT) on each highway section. All traffic estimates are derived from the most recent vehicle counts, which may have been taken from 2011 through 2016 inclusive.

AADT is defined as the number of vehicles passing a given point on an average day of the year.

For official estimates of AADT on all highways in Manitoba please refer to Traffic on Manitoba Highways 2016, or the Manitoba Highway Traffic Information System website ([www.mhtis.mb.ca](http://www.mhtis.mb.ca)).

Please note that the additional geographical features on this map, such as rivers, lakes and parks, are not meant to be exhaustive, and are provided for use as points of reference only. Additionally, due to map scale some AADT values are not shown around towns. Consult the webmap at <http://mhtis.mb.ca> for AADT information at these locations.
